LUIZ CAMARGO

SOFTWARE DEVELOPER

ABOUT

Full Stack Developer passionate for solving problems in code form and create new things.
Excellent relationship between people in the workplace, experience with customer service, leadership and great communication.
Clean Code is my philosophy.

EXPERIENCE

Full Stack Developer Mid-Level
AKA Tecnologia | Jan. 2021 - present
Tech Stack: HTML5, CSS3, AngularJS, JQuery, C#, SQL Server

Same activities as the previous position plus:
- Appointed to lead the AKA Tecnologia team on the Intertox project.

Due to my above-average performance in the company and client evaluation, I was appointed to lead the AKA Technology team on the Intertox project. In addition to my previous roles, I help the younger ones in the development and architecture of the project, mainly in team integration, I do code reviews and a weekly report on the performance of the AKA team on the project.

Full Stack Developer Junior
AKA Tecnologia | Jan. 2020 - Jan. 2021
Tech Stack: HTML5, CSS3, AngularJS, JQuery, C#, SQL Server

- Assigned to be part of the Intertox client development team (Web Development).
- Focused on project implementations, refactorings and bug fixes sustainably and cleanly.
- Adapted to working with agile methodology.
- Robust system structured in ASP .NET MVC + DDD + EF.

I work directly with the Intertox client in the SafetyChem Software, a system with several functionalities and used by important chemical companies in Brazil. The core of the system is in the generation of dynamic reports for chemical products, where each company has its particularity, therefore several implemented business rules and constant customizations.

Information Technology Internship
DP World | Jul. 2018 - Jan. 2020

Tech Stack: HTML5, CSS3, AngularJS, JQuery, Knockout, C#, SQL Server

- Web Development in port ambit.
- Performed Tasks as required by the port terminal, used Jira to monitor tasks and ensure qualified delivery.
- Incident analysis, code debugging and bug fixing.
- Robust system structured in ASP .NET MVC + EF.

In short, I attended Jira's demands as port employees had system problems or received complaints from users, it is an internal and external maritime system with many functionalities and business rules, where I created my development expertise. In addition to interpersonal relationships in the workplace.
